

Philosophy Book Recommender

Final project, COMP 4450 (MLOps), Summer 2026 — experiment tracking & model registry evidence.

Two models were trained on the frozen dataset artifact philosophy-dataset:v2 (4,154 reviews / 736 items / 1,537 users, a true iterated 3-core of the Amazon Reviews 2023 Books philosophy slice) and evaluated through a shared hold-out harness: for each of 430 users with ≥ 3 ratings, hide their highest-rated book and check whether it appears in the top 10 recommendations.
